

Experience research...

- at UK universities and research institutes
- with practising scientists, technologists, engineers and mathematicians.

Our undergraduate research bursaries are designed for those considering scientific research as a career. They enable students to take part in a defined research project for 6-8 weeks of the summer vacation.

Students receive a bursary of £180 a week (£190 London) to make the most of the experience and gain a detailed insight into research.

"I was able to make a real contribution to an international physics experiment, which is exciting, as I've only just finished the second year of my degree."

Caroline Clark, Physics, Imperial College London

Find out more...

Nuffield Science Bursaries inspire students across the UK with over 1,500 funded places a year.

Visit www.nuffieldfoundation.org/nsb for full details on how to apply.

Lord Nuffield

About us

"Committed to the careers of young scientists through curriculum development and practical schemes."

The Nuffield Foundation is an independent charitable trust established in 1943 by William Morris (Lord Nuffield) the founder of Morris Motors.

Our aim is to fund research, development and practical experiment in education, science, social science and social policy.

To find out more about our two science bursary schemes for undergraduates and for schools and colleges, please visit our website at www.nuffieldfoundation.org/nsb

The Nuffield Foundation

Experience science...

- on real research and development projects
- with practising scientists, technologists, engineers and mathematicians.

Our schools and colleges bursaries are for students in their first year of an advanced or higher-level science, technology, engineering or maths (STEM) course. They offer the opportunity to join a project for 4-6 weeks during the summer vacation in any area of STEM.

Students receive an £80 a week bursary, an insight into the world of scientific research and development including areas of technology, engineering and maths, and something that sets them apart from other students.

"I found the experience positive, interesting and enriching."

Lara Hand, Loreto Grammar School, Queens Medical Biology Centre.

Get involved...

Nuffield Science Bursaries are inspiring the next generation of scientists, technologists, engineers and mathematicians at school, college and undergraduate level.

With over 1,500 funded placements each year, there's never been a better time to get involved.

"It has opened my eyes to the inner workings of research, and although it was very challenging, it was also incredibly rewarding."
